SECURITY

Protection for you and your family

Feel Completely Safe and Secured

If you forgot your keys or want to let a family member in your home while you're away, you can allow access to your home remotely. Intelligent security puts peace of mind at your fingertips so you can rest assured that all is safe.

Experience the power of remote access

With your access control devices, you can monitor your home while away, remotely open. You also can see who is at the door. You'll have clear live images of your visitor and you can easily speak to them from wherever you are with excellent sound quality.

Get peace of mind

Sensor devices, such as intrusion sensor, carbon monoxide and smoke detector, and water leak sensor, gives you peace of mind, knowing that you'll be made aware of potential danger so that you can react accordingly to prevent harm from coming to you and your loved ones.

ENERGY

Control and Save your home energy

Control your energy

The Smart Thermometer, it's always a pleasant temperature and the heating in each room can be individually controlled, your home will take care of this automatically for you.

Intelligent energy consumption tracking

Smart power monitor listens to every appliance to make your home more efficient, informed, and secure. Whether you want to review specific device or particular day's activity, everything you need to know is available at a tap.

Save your energy bill with your climate control devices

The rooms in your home will be at the right temperature at the right time of day. It measures how long it takes to reach the desired temperature and whether it needs to adjust the time it turns the heating or cooling on as the seasons change.

LIGHTING

Experience limitless possibilities with smart lighting

Control your light

If you have already left home and cannot remember if the lights are off, you will not need to physically double back. You can check remotely, even from halfway around the world.

Set the mood with simple touch

Combine your main lights, lamps and color changing lighting to create your own lighting moods – changing the feel of a room in an instant. Activate these lighting moods with simple touch of a switch or with mobile app.

Ward off unwanted guests

Lighting Solution helps you increase your home's security, in that you can turn lights on and off remotely to increase visibility and deter burglars. If you are away from home, you can schedule your lights to turn on.

ENTERTAINMENT

Enjoy more time for your life

Incorporate as many devices as you want

Smart home entertainment solution allow you to connect to many different devices like DVD players, sound systems and even gaming consoles such as PS4, Xbox, or computer. In this way, the home theater becomes the hub of technology in your household.

Your favorite music in every room

With smart home theaters, you'll be able to control what's playing all around the house. You'll have an overview of what's playing and make individual adjustments at any time.

Lights, Camera, Action!

When your home movie begins, you can dim your lights. When your movie ends, the lights can brighten. You can also customize the commands further to incorporate voice controls, so that when you say something like, "begin the movie," the systems turn off the lights and turn on the movie. This helps round out your theater experience so that you feel like you are in a real movie theater.

PROFESSIONAL INSTALLATION

NETWORK

Innovating for better IoT experience

A centrally controlled, safe networking system gives you the freedom to move around and the comfort of knowing you will have secure connectivity in every room in the house.

Why the network matters

Your smart home needs a network that is scalable, adaptable, intuitive, and ready to perform. A strong network foundation will ensure that all of your automated conveniences, audio and video luxuries, and security systems are reliable and functioning optimally.

Increase reliability with mesh network

Mesh networking is a fancy way of saying every device is able to talk to every other device. The advantage in home automation is multiple paths to the destination device. Whether you have an existing smart home or are looking to start, we can help connect you with the right products.

OUR SIMPLE STEP PROCESS FLOW
